

## WEB HOSTING – TECHNICAL SPECIFICATIONS

: SERVER DETAILS / FEATURES / SECURITY :

Under your plan, your server is managed under the New Prodigy Marketing Group (NPMG) web hosting system. The following describes the key features of our servers (i.e. the home of your website) including email, database, security, and other technical components.

Note that some features are specific to the unique requirements of each client's website, and therefore, may not be listed here, but are customized on a project-by-project basis.

### **Data Center and Network**

The NPMG data centers are among the best in the business and have redundancies in all the critical systems including power and HVAC systems. They are built for exceptional uptime, are all SAS-70 compliant, and are located at various locations throughout North America which enables us to provide maximum redundancy and eliminate single-points-of-failure (SPF).

To provide multiple redundancies in the flow of information to and from the data centers, NPMG partners with nine separate network providers and utilizes only high-performance bandwidth. The network's configuration, co-developed with Cisco, guards against any single-point-of-failure at the network layer.

Finally, to ensure the fastest and most reliable network connections possible, the entire network is closely monitored for efficiency and end-user performance, and the network's topology and configuration automatically adjust in response to traffic pattern changes.

## Web Hosting – Technical Specifications

Disk Space and Traffic	
Web Space	Custom
Monthly Traffic	Custom
Hits/Month	Unlimited

Web-based Email Access	
Webmail	Yes
Email Accounts	Unlimited
Spam Filtering	Yes
Email Antivirus	Yes
Manage Spam Options	Yes
Manage Safe and Block Lists	Yes
Set Out-of-Office / Vacation Message	Yes
Email Forwarding	Yes
Add External Email Accounts	Yes
Integrated Contacts	Yes
Integrated Calendar	Yes
Integrated Tasks	Yes

Security	
Redundant Firewalls	Yes
Redundant Load Balancers	Yes
Full System Administration	Yes
Fully Managed Backups	Yes
Proactive Security Patching	Yes
Software Upgrades Testing and Deployment	Yes
Denial of Service (DOS) Mitigation	Yes
SAN (Storage Area Network) Storage Technology	Yes
SSL (Secure Socket Layer) Encryption	Extra Charge

Database	
MySQL Databases	Extra Charge
MS-SQL Databases	Extra Charge
24 x 7 x 365 Phone Support	Extra Charge

<b>Technology</b>	
Window <b>AND</b> Linux Web Hosting	Yes
TrueHybrid Technology	Yes
<b>Linux Technologies</b>	
Linux Distributions	Debian / Red Hat Enterprise
Apache	v1.3 and v.2.0
PHP 4	v4.4.7
PHP 5	v5.1.6
Perl	v5.8.4
MySQL	v4 or v5
Ruby on Rails	Ruby v1.8.5 on Litespeed Enterprise
<b>Windows Technologies</b>	
Windows Edition	Windows 2003 Server
